FULL RANGE

# ELLIPTIBase

## The Revolutionary Ti-Base

Due to the interdental space in the anterior teeth section, restoration in these positions has always been a challenge. Traditional Tibases, have to use less material and in consequence a weaker restoration is achieved. ELLIPTIBase® is our revolutionary solution specially designed for narrow implant platforms.

Available in 2 orientations (flat & corner) to adapt to any clinical case

The 22% reduction achieved allow more space for the restoration whilst keeping the cementation area. With a 20° screw angle channel the ELLIPTIBase® is the perfect solution for narrow restorations.

Dear Customer,

Once again, we are pleased to introduce you our new 2020 range of products. This year is presenting challenging conditions for all humankind; and the extend of the global impact is yet to be seen.

Although this being a moment of huge uncertainty, at DESS® we have wanted to turn it around and look for the positive side of the situation. This perspective has led us to work hard and take advantage of the market downturn to focus our efforts on innovation.

Making a recap of last year, 2019 was an outstanding year for us; we've increased sales in most of the countries we have presence, we added distribution in new markets, and our customer loyalty is growing substantially.

Following our core value, the "Pure Switch" concept, we keep developing all our products to be fully exchangeable with OEM parts. One of the key pieces of any prosthetic solution is the screw, which is the connection between the implant and the prosthesis. Keeping in mind this idea, DESS® screws are the backbone of the "Pure Switch", as they are exactly the same as the original ones.

This new catalogue is full of new products as the newly developed ELLIPTIBase®, a perfect aesthetic solution for small-spaced prosthetic cases, the C-Base® with a non-engaging alternative and different gingival heights, new patented screwdrivers or the new compatibility with Straumann® BLX and Neodent Grand Morse®.

Innovation has always been one of our core values, but this year it is undoubtedly our invaluable weapon, and it has been our inspiration and motivation for this year range. Along with it, the quality is always guaranteed by our lifetime warranty which covers all our products.

Despite the fact that 2020 is presenting itself challenging, we are confident we will be able to transform the hardest moments into valuable opportunities that will allow us to emerge strengthened from this situation.

We would like to thank you for your trust on our brand and team; we hope we can continue this journey together.

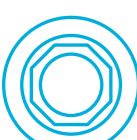

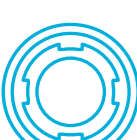

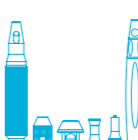

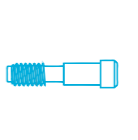

Sincerely,

Roger Terrats  
COO

# Welcome to DESS

Located in Barcelona, Spain our HQ of 6,500m<sup>2</sup> is one of the most modern manufacturing facilities in Europe

**“Staying true to our history and values empowers our brand”**

Since our beginnings quality has been quintessential to our philosophy and is reflected in every product that we manufacture. Our choice of the best Swiss and Japanese milling machines allow us to create the most precise parts. Our quality standards entails measuring to a few microns of precision.

## Some Key dates of our company history:

- **1947** Founded in Barcelona. Manufacture of precision mechanical components.
- **1970** 70% of production using Swiss-style automatic lathes.
- **1988** First purchase of a Japanese numerical control Okuma CNC lathe.
- **1997** First Japanese Okuma CNC machining.
- **1999** First incorporation of DECO lathes specialized in micro precision machining.
- **2000** ISO 9001 Certification. 2003 100% of production using numerical control CNC machines.
- **2004** First production of dental implant components.
- **2008** Creation of the sanitary department with its own clean room.
  - Sanitary certificate ISO 13485 and CE.
  - Creation of the DESS Dental Smart Solutions brand.
- **2009** SelectGrip® Patent for surface finishes. 200% proven increased retention of cemented crown.
- **2011** DESS already has a presence in 16 countries around the world.
- **2012** Creation of DESS GmbH in Düsseldorf, Germany.
- **2013** DESS already has a presence in 26 countries around the world.
- **2014** DESS LAB starts offering one piece custom abutments.
- **2015** Health Canada approval.
- **2016** We completed the full assortment of angulated multiunits.
  - We launched a revolutionary intraoral scan abutment, without hole on top.
  - METALIVE® is accepted by the regulatories as the unique surface offering real soft tissue attachment and finally available in Europe.
  - DESS is present in 34 countries worldwide.
- **2017** Achievement of FDA.
  - Relocation of manufacturing plant and offices with a total of 6500m<sup>2</sup>.
- **2018** We launch our angulated screw channel solution "AURUMBase®".
  - Resellers in 41 countries.
  - 100% Increase of the production.
- **2019** Creation of the DIY range.
  - Two new compatibilities launched.
- **2020** The ElliptiBase®, revolutionary solution for narrow interdental space.
  - Three new compatibilities launched.

**“Great things are done by a series of small things brought together”**

A business without quality will not last. Terrats Medical is in its third generation and we want to honour our heritage with the highest requirements on quality in all we do.

A man wearing safety glasses and a grey t-shirt is focused on his work at a microscope in a dental laboratory. The background is blurred, showing other lab equipment and a computer monitor. The man's t-shirt has the DESS logo on the sleeve.

**“The difference between something good and something exceptional is in the smallest detail”**

At DESS® we believe that no detail is too small to escape close attention. That's why our exhaustive quality controls in every single part of the manufacturing process ensure that the quality of our products is guaranteed. Our confidence is such that we offer a lifetime warranty on all our products.

**“There is no good idea  
that cannot be improved”**

We are proud to say that innovation and quality are at the center of our core values. We look at different solutions and re-engineer them to provide better and more reliable alternatives. Products like our intra-oral scan abutment without a screw hole, which improves substantially the image precision, our angled Multiunit abutment with a fully shaped connection and vertical access for more stability and less screw loosening or our angulated screw channel solution AURUMBase® that allows you 25° angle with a 360° rotation, are clear examples of our way of doing things.

# THE BEST OF BOTH WORLDS

Our new patented screwdrivers design has been conceived taking the best of the parallel & the conical screwdrivers.

## Parallel Screwdrivers:

- + Clamping
- Screw head protection
- Durability

## Conical Screwdrivers:

- Clamping
- + Durability
- + Screw head protection

By taking the best of both designs we created an overall better screwdriver.

## DESS® Screwdrivers:

- + Better clamping
- + Screw head protection
- + Durability

All DESS screwdrivers are manufactured in Stainless Hardened Steel for increased durability and wear resistance.

# LIFETIME WARRANTY

Here at DESS we believe in excellence, we put our passion into every single detail of our products. Since early days we've understood that saying this wasn't enough so we pioneered introducing the lifetime warranty in all our products.

We're so confident about the quality and performance of our products that we give as standard a Lifetime warranty on all the products we manufacture. That's the DESS commitment

If you want to know more about our warranty and the 3rd party implants warranty visit our website [www.dess-abutments.com](http://www.dess-abutments.com) and download the warranty.

# DESSLoc®

## Superior resistance, better results

Coated with a Zirconium nitride (ZrN), the DESS® overdenture anchor system offers you better resistance with less plaque adhesion improving results and reducing inflammation

- 100% compatible with the most popular system
- Reduces plaque adhesion
- Decreases inflammation

DESSLoc® coated with Zirconium nitride:

aMMP-8 values of fluid from peri-implant sulcus in titanium (Ti) and Zirconium Nitride (ZrN) coated attachments at different times after prosthetic restoration. (Matrix Metalloproteinase-8 Levels in Peri-implant Sulcus Fluid Adjacent to Titanium and Zirconium Nitride Surface, Richard Meissen, MSc1 Mariana Mintcheva, MSc1 Lutz Netuschil, PhD Dr2, Int J Periodontics Restorative Dent 2014; 34:91-95. doi: 10.11607/prd.1504)

# Analogues

Our analogues have been carefully designed to match the implant connection to perfection.

Manufactured either in stainless steel AISI 303 and Titanium grade 5 ELI, color coded to match the implant platform; making easier work with several different platforms.

- Color Coded to match implant platform
- Precise connection guaranteed
- For 3d and traditional clay models

## Coming soon

**New 3D printed model Analogs:** Although our standard analogues can be used on both type of models, these new analogues feature a small screw to guarantee that the analogue reached the lower end of the model.

Full thread in the connection cone means a safer and more stable prothesis

The vertical access of the screw facilitates the placement of it. It also allows you to tight it at maximum torque of 35Ncm\* avoiding loosening and improving the stability of the Multi-Unit abutment.

\*According to compatibility

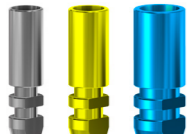

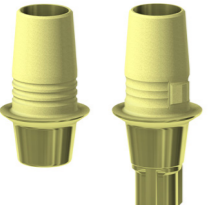

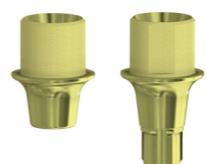

The DESS® Ti Base for Multi-Unit® is available in two different heights: 6mm and 8mm.

Full shaped connection provides more stability.

# We are DESS®

DESS® offers a variety of dental prosthetic solutions for nearly all the connections available in the market. DESS® product quality is as good or better than the quality of well-known brands. The **“pure switch concept”** on which our products are conceived assure full compatibility with the implant brand chosen.

# C-Base®

## RE-ENGINEERED TO PERFECTION

No need for introductions, the C-Base® is our take on the Sirona® Cerec® Ti-base. Based on the pure switch concept we took on the already flawless Sirona Ti-base and enhanced some of its properties.

### Select Grip® surface treatment

Better bonding properties, reducing up to 15 min of preparation time

### Different gingival heights

To cater for different clinical situations

### Gold anodised coating

Improved finish for better overall aesthetics 15 min of preparation time

### Engaging or non engaging

First in the market non engaging ideal for bridges

### Final screw included

No added costs

# SelectGrip®

Our patented surface enhancement treatment improves retention up to 500%.

SELECT GRIP® is a special sandblasted treatment which provides a significant improvement in retention levels of cemented prosthesis. Applied for both abutments and Ti-bases, the adhesion to the final cemented prosthesis improves significantly.

This graph shows the average pressure in kilograms before the joint between the titanium sleeve and titanium abutment/titanium base breaks

\*Comparison between two different sets of titanium abutments and titanium bases cemented to a standard titanium sleeve. The cement used for the test is Relyx Unicem from 3M®.

### The importance of a factory treatment:

Building retention in house not only means more chair time but if its not done properly (below the collar) this can increase the chances of gingivitis.

# THE IMPORTANCE OF A PRECISE IMAGE

Our Ball desktop scan abutment designed in conjunction with Exocad® and the revolutionary toolless intraoral scan abutment, have been carefully designed to produce the most precise image, without glitter effect.

The Titanium material used in the intraoral scan abutments allows for Rx control

NO SCREW HOLE  
no distortion on scan

ORIENTATION ON HIGHER POSITION  
(Maximization of the visibility)

MANUFACTURED IN TITANIUM  
(Extremely durable)

# Ti-Bases

Manufactured in Titanium Grade V ELI, and available in different gingival heights, the DESS Ti-Bases are a great alternative to the OEM products. The main advantages are:

## SelectGrip enhanced retention

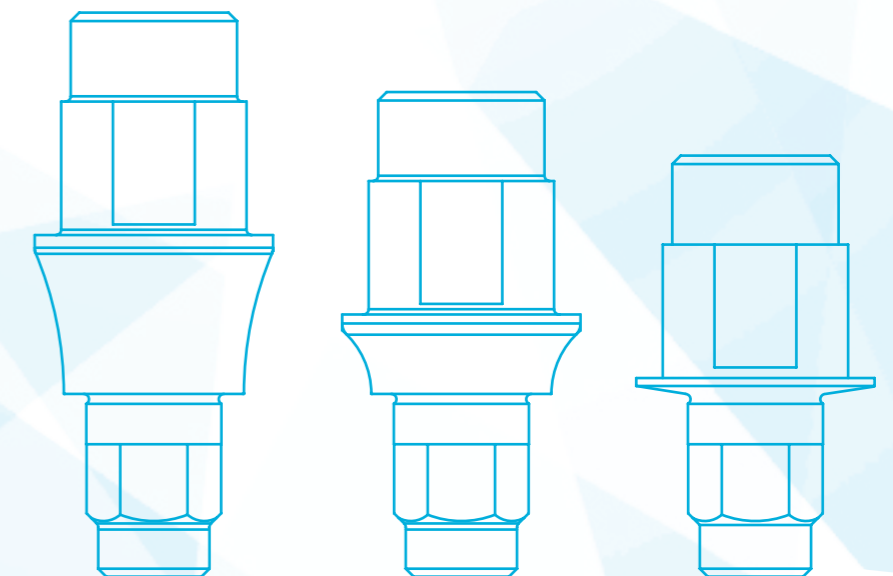

Patented surface treatment that increases retention

## Different Gingival Heights

Available in different heights to cater for every case

## Anatomic profile

DESS Ti-bases geometry design has an anatomic profile for better, deeper and seamless restorations
