POLA DAY POLA NIGHT

Fluoride releasing

Pola Day and Pola Night both contain fluoride, which helps strengthen the tooth to protect it against sensitivity.

Safe and convenient

Pola Day and Pola Night's unique high water content formulation has a neutral pH to protect gums and teeth during treatment.

Effective whitening

The desired whitening effect can be achieved in as little as 30 minutes twice per day or can be conveniently applied overnight while you sleep. There are a variety of different strengths of Pola Day and Pola Night that patients can use at home.

Pola Desensitising Technology (PDT)

Pola Day and Pola Night contain PDT to assist with the prevention of post treatment sensitivity. Both Pola Day and Pola Night contain 20% water which prevents dehydration and helps reduce or eliminate sensitivity.

SDI | RIVA SELF CURE

BULK FILL GLASS HYBRID RESTORATIVE SYSTEM

25%
DISCOUNT

THE UNIQUE BIOMIMETIC FOR LONG TERM RESTORATIONS

Formulated using patented *ionglass™* technology, Riva Self Cure has restored the smiles of over 50 million people across 100 countries.

The next generation of glass ionomer, this high performance system combines a glass hybrid restorative with a strong resin coat to maximise the longevity and the strength of your patient's restorations. Riva Self Cure has earned its reputation through superior fluoride release, strength and great handling.

Perfect for a wide range of clinical situations, Riva Self Cure is the bulk fill solution you need to save you time and to mimic some of the best characteristics of the tooth.

SDI | RIVA LIGHT CURE

LIGHT CURED RESIN REINFORCED
GLASS IONOMER RESTORATIVE MATERIAL

THE MULTI AWARDED EASY HANDLING GLASS IONOMER

Riva Light Cure contains *ionglass™* filler, made of a unique blend of different sizes of ultrafine highly reactive glass particles.

This bioactive proprietary hybrid glass enables long term restorations, being outstanding in handling, strength and aesthetics.

The *ionglass™* filler contains fluoride and strontium ions which synergistically enhance tooth biomineralisation. [Source: Thuy et al. Arch Oral Biol. 2008 Nov; 53(11):1017-22]

Superior biocompatibility ensures healthier teeth, the restoration will last longer and the patient will be more satisfied.

RIVA CEM AUTOMIX

Riva Cem Automix is a self-curing, radiopaque, fluoride releasing paste/paste resin modified glass-ionomer luting cement. It is indicated for the permanent cementation of metal and ceramic restorations. The automix tip attachment offers convenience over traditional hand mixed cement systems.

SET PP

seT is a self etching, self adhesive, resin cement, designed for final cementation of metal, resin, all ceramic and ceramic based restoratives. seT chemically bonds to tooth structure and all types of core material. seT is available in capsules and a paste/paste automix syringe system [seT PP].
